School Accountability Report Card Reported Using Data from the 2017—18 School Year California Department of Education

By February 1 of each year, every school in California is required by state law to publish a School Accountability Report Card (SARC). The SARC contains information about the condition and performance of each California public school. Under the Local Control Funding Formula (LCFF) all local educational agencies (LEAs) are required to prepare a Local Control and Accountability Plan (LCAP), which describes how they intend to meet annual school-specific goals for all pupils, with specific activities to address state and local priorities. Additionally, data reported in an LCAP is to be consistent with data reported in the SARC.

- For more information about SARC requirements, see the California Department of Education (CDE) SARC web page at https://www.cde.ca.gov/ta/ac/sa/.
- For more information about the LCFF or LCAP, see the CDE LCFF web page at https://www.cde.ca.gov/fg/aa/lc/.
- · For additional information about the school, parents/guardians and community members should contact the school principal or the district office.

School Safety Plan (School Year 2018—19)

focused on the district's major areas of focus in English Language Arts, Mathematics, and English Language Development. These goals align with our LCAP plan and the Common Core State Standards. Professional Development activities are planned by the school site's Instructional Leadership Team in collaboration with the district Teaching, Learning, and Leading (TTL) Department. In addition, teacher passion is driving changes in the social studies and science curricula; the staff continues to honor the use of academic data to inform instruction, and provides effective support for students who are preparing to take the Common Core-Aligned SBAC assessment for language arts and math.

Quality instruction and instructional leadership are at the heart of the district's achievement efforts. To ensure this quality and leadership, the TLL Department engages teachers, administrators, and other personnel in ongoing professional development focused on improving teaching and learning. Training is provided to principals and other administrators to improve their ability to provide strong instructional leadership and guide teaching and learning at school sites. The principals in turn, provide support to teachers through staff conferences, opportunities for collaborative study and planning, and individual coaching based on ongoing classroom observations. Teachers and other staff are provided with both on and off-site professional development in all Common Core-based curriculum content areas. Beyond the content areas, professional development is provided in English Language Development, differentiated instruction, and educational technology. In addition, training is made available in classroom management and the effective use of assessment data and teacher data teams in meeting the needs of all students. A primary goal of the professional development program is ensuring that all students are served by skilled, highly-qualified teachers, and that teachers are supported by strong, knowledgeable instructional leaders.
