

8. The District will endeavor to list, whenever feasible, more than one product or system when more than one product or system is acceptable and the conditions are sufficiently satisfied.

9. That some of the Designated Products Exhibit "A" are the only acceptable material(s), product(s), thing(s), or service(s) for use on projects in the Construction Program because, as indicated in the list of that Designated Product, the District is conducting a field experiment to determine the suitability of the material(s), product(s), thing(s), or service(s) for future use.

10. That the remaining Designated Products Exhibit "A" are the only acceptable material(s), product(s), thing(s), or service(s) for use on projects in the Construction Program because, as indicated in the list of that Designated Product, the Designated Product is the product(s) in use on other District public improvement(s).

Exhibit "A"

1. HARDWARE

- A. District's Exterior Keying System
- Manufacturer: Allegion-Schlage
 - Model: Primus

The District intends to match these products and systems already existing in use, and is endeavoring to better coordinate the training, maintenance, and repair of products and systems throughout the District. The ever-increasing cost and coordination of varied products and systems with a limited maintenance personnel staff and a limited budget for outside vendors, requires the District to have a limited number of products and systems to facilitate more control and cost containment in keeping the products and systems operational.

- B. Finish Hardware Locksets, Mortise
- Manufacturer: Allegion-Schlage
 - Model: Vandgard Lever Type 17

The District intends to match these products and systems already existing in use, and is endeavoring to better coordinate the training, maintenance, and repair of products and systems throughout the District. The ever-increasing cost and coordination of varied products and systems with a limited maintenance personnel staff and a limited budget for outside vendors, requires the District to have a limited number of products and systems to facilitate more control and cost containment in keeping the products and systems operational.

- C. Finish Hardware Locksets, Cylindrical
- Manufacturer: Allegion-Schlage
 - Model: ND Series, Sparta Style

The District intends to match these products and systems already existing in use, and is endeavoring to better coordinate the training, maintenance, and repair of products and systems throughout the District. The

3. ENERGY MANAGEMENT CONTROLS

A. EMS and HVAC

- Manufacturer: Alerton Technologies
- Model or Series: BACTalk Series

The District intends to match these products and systems already existing in use, and is endeavoring to better coordinate the training, maintenance, and repair of products and systems throughout the District. The ever-increasing cost and coordination of varied products and systems with a limited maintenance personnel staff and a limited budget for outside vendors, requires the District to

The District intends to match these products and systems with those already existing in use, and is endeavoring to better coordinate the training, maintenance, and repair of these products and systems throughout the District. The ever-increasing cost and coordination of varied products and systems with a limited maintenance personnel staff and a limited budget for outside vendors, requires the District to limit variance in these types of products and systems to allow more control and cost containment in keeping the products and systems operational.

- E. Network Equipment Cabinet
 - Manufacturer: APC

The District intends to match these products and systems with those already existing in use, and is endeavoring to better coordinate the training, maintenance, and repair of these products and systems throughout the District. The ever-increasing cost and coordination of varied products and systems with a limited maintenance personnel staff and a limited budget for outside vendors, requires the District to limit variance in these types of products and systems to allow more control and cost containment in keeping the products and systems operational.

.

5. ACCESS CONTROL AND VIDEO SURVEILLANCE

- A. Access Control
 - Manufacturer: Genetec
 - Model or Series: Uni-View Access Control

The District intends to match these products and systems with those already existing in use, and is endeavoring to better coordinate the training, maintenance, and repair of these products and systems throughout the District. The ever-increasing cost and coordination of varied products and systems with a limited maintenance personnel staff

- A. Main Panel
 - Manufacturer: Honeywell
 - Model or Series: Ademco

The District intends to match these products and systems already existing in use, and is endeavoring to better coordinate the training, maintenance, and repair of products and systems throughout the District. The ever-increasing cost and coordination of varied products and systems with a limited maintenance personnel staff and a limited budget for outside vendors, requires the District to maintain in these types of products and systems to facilitate more control and cost containment in keeping the products and systems operational.

7. FIRE ALARM SYSTEM

- A. Main Panel
 - Manufacturer: Gamewell
 - Model or Series: E3

The District intends to match these products and systems already existing in use, and is endeavoring to better coordinate the training, maintenance, and repair of products and systems throughout the District. The ever-increasing cost and coordination of varied products and systems with a limited maintenance personnel staff and a limited budget for outside vendors, requires the District to maintain in these types of products and systems to facilitate more control and cost containment in keeping the products and systems operational.

8. IRRIGATION SYSTEMS

- A. Irrigation Controllers
 - Manufacturer: Rainmaster
 - Model or Series: DXI

The District intends to match new landscape planting systems and products with those already existing in use, and is endeavoring to better coordinate the training, maintenance, and repair of these systems throughout the District. The ever-increasing cost and coordination of varied systems with a limited maintenance personnel staff and a limited budget for outside vendors, requires the District to maintain in these types of systems to facilitate more control and cost containment in keeping the systems operational.

- B. Controller Enclosure and Lock
 - Manufacturer: VTI Products
 - Model or Series: Strong Box SB16SS

The District intends to match new landscape planting systems and products with those already existing in use, and is endeavoring to better coordinate the training, maintenance, and repair of these systems throughout the District. The ever-increasing cost and coordination of varied systems with a limited maintenance personnel staff and a limited budget for outside vendors, requires the District to maintain in these types of systems to facilitate more control and cost containment in keeping the systems operational.

9. PAGING SYSTEM

A. Public Address, Mass Notification Systems and Clocks

- Manufacturer: Bogen
- Model: Nyquist

The District intends to match these products and systems already existing in use, and is endeavoring to better coordinate the training, maintenance, and repair of these products and systems throughout the District. The ever-increasing cost and coordination of varied products and systems with a limited maintenance personnel staff and a limited budget for outside vendors, requires the District to maintain in these types of products and systems to facilitate more control and cost containment in keeping the products and systems operational.

10. FOOD SERVICE EQUIPMENT

A. Speed line hot, cold and freezer cabinets and mobile wash stand manufactured by the following manufacturer:

- Manufacturer: GA Systems, Inc.
- Model or Series: Speedee-Ser-Series

The District intends to match Food Service equipment and systems and products already existing in use, and is endeavoring to better coordinate the training, maintenance, and repair of these systems throughout the District. The ever-increasing cost and coordination of varied systems with a limited maintenance personnel staff and a limited budget for outside vendors, requires the District to maintain in these types of systems to facilitate more control and cost containment in keeping the systems operational.
