# Creating the Capacity

Capacity calculation allows for equal number of set aside rooms at every site versus basing set aside rooms on current use and a percentage of classrooms

- Elementary school-6 rooms plus

# Class Loading Standards

- Grades TK to 3 are loaded at 24:1.
- TK and K are assumed to be single session classes. Only one class per room.
- Grades 4 to 6 are loaded at 33:1.

# Facility Utilization

The utilization factor is determined by comparing the Enrollment at each school to its Capacity which is based on the District standards. This results in a better understanding of the facility needs.

- Well utilized school sites are expected to be between 80% and 95% at the elementary level and 75% to 90% at the secondary level to allow for anomalies in student numbers per grade and master schedule constraints.
- The capacities included portable classrooms currently in use.

# Potential Program Approach

A	Solve small scale critical issues at select school sites before continuing with all school replacement
B	Embrace modernization through a combination of full modernization and/or replacement
C	Divide Funding Between Each Family and Work with Each Family to Identify The Unique Needs and Priorities for Each of Their Communities
D	Continue with replacement program but with revised standards and adjust capacities
E	Continue with ALL school Replacement Program
