As we are moving forward to design our in-person support programs for the spring we are moving forward on multiple fronts. We are currently working with our labor partners to determine the number of volunteers that are available to support intervention and hubs. In addition, we have cleared outside support partners that will be able to augment our model to provide additional support for in-person instruction. To be able to utilize these supports we will need to amend the current contracts to add the additional scope of support. Due to the timing of this process the Business Services office will approve the amendments of the contract to ensure service for students begins in a timely manner and we will bring forward the adjusted contracts for ratification at subsequent board meetings. These contracts will be for partners that are already board approved and cleared to work directly with students. If you have any questions about this process and the need for ratifications, please reach out directly to Dr. Wold.

California Public Records Act Requests - Tony Wold (Phyllis Rosen)

One of the areas that takes up significant staff time is the follow-up on Public Records Requests. Periodically we will provide an update to the Board of the requests that are active during the previous couple of months.
