High School Plan Developed

Every supervising teacher at Vista is well-versed in analyzing student transcripts to determine exactly what courses and credits a student needs to achieve graduation. Teachers and students work together to plan a course of study for high school. A final in-depth analysis happens in a student's senior year in the form of Senior Letters. Few students are enrolled at Vista for all four years of high school. As is more likely the case, students with credit deficiencies enroll at Vista as sophomores, juniors, or seniors. For those students who will not graduate in four years, a post-high school plan is made that may lead to high school graduation. A graduation plan was made for 201 students in 2011-12, 195 students in 2012-13, and 164 students in 2013-14. The declining numbers reflect a reduction in staff and enrollment.

College Readiness

Community k, therEse Complete options, I not

Students are encouraged to enroll in community college courses as a way to pursue interests, increase course options, and make up credits. Because our students are not in school 30 hours a week, there are more opportunities to take a community college course. Students usually complete courses at nearby Contra Costa College (CCC), which maintains a partnership with the district, and a close partnership with Vista High. Counselors from CCC have met with students to inform them of the process to register at the school and enroll in a course. In 2013-14, arrangements were made for Vista students to take placement tests for math and English in the computer lab on site at Vista High. There was a 50% increase in course completion between 2012 and 2014. The chart shows a growth from 17 to 26 to 34 students.
